

To whom it may concern i am a subscriber to XM radio. I also live in the washington metro area. What is the connection here? well i depend on XM radio to give me accurate traffic conditions and weather on my way to and from work. they are on 24 hrs a day and i do not have to wait for commercials to be over before i get an idea of what lies ahead as i had to do before with regular FM channels. Unlike FM and AM channels the reception quality is the best and i can clearly understand road conditions. please do not kill this valuable service.

thank you
